

HASSLACHER Group

Sustainable Commitment

As a corporate group, we are committed to working towards the Sustainable Development Goals (SDGs) of the United Nations. With our commitment, we would like to contribute to upholding the ecological, social and economic values that are fundamental to society and to our long-term adding of value.

Environment

In the field of environmental protection, we focus on the topics of climate protection, adjustments to climate change, energy, biodiversity, circular economy and resource efficiency. We take measures to counter climate change and are committed to generating renewable energy and improving energy efficiency in our production processes. We source our raw material wood from forests cultivated and managed according to strict laws and directives. Our wood is harvested and used without waste in compliance with all legal framework conditions.

Social matters

With our branches in several countries, our more than 2000 employees and our global supply chain, we can have a positive influence on the lives of many people by implementing labour and human rights laws. We are committed to upholding and strengthening labour and human rights laws, ensuring safe working conditions, supporting mental health and wellbeing and offering our employees good further training and development opportunities in their work. We are obliged to treat all persons with respect, refute any form of discrimination and respect individual traits such as gender, age, sexual orientation, nationality, religious and political convictions.

Corporate management

We are obliged to comply with all applicable laws and regulations, to combat all forms of corruption and bribery and not to tolerate any form of inappropriate behaviour. We are committed to upholding correct business practices within our organisation and to promoting such practices among our business partners.

Through dialogue with our stakeholders and transparent reporting about our sustainability efforts, we strive to achieve continuous improvement in the fields mentioned above and seek to contribute to a liveable world.

Our vision

Systems solutions

We are a **globally active innovation leader** in the field of **intelligent** and **integrated systems solutions** for **modern timber construction**.
